The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 6-10, are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 5994816 (Dhuler).

Dhuler discloses a MEMS actuator comprising a planar substrate 32 with first and second anchors 34, an in-plane shuttle 42 floating on the substrate for motion parallel with the substrate, plural elongated thermal half-beams 36, electrical contact and heater 38 is used to actuate the thermal half-beams.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5, 11-18, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 5994816 (Dhuler). Dhuler discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose different shapes of the thermal beams. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to elect thermal beams having different shapes in the system of Dhuler for the purpose of achieving appropriate power output.

Claims 3, 9, 19, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-31 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. 6023121, Mahadevan et al, and Wood disclose thermal actuators comprising many beams mounted between 2 anchors.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (703) 308-3477. The examiner can normally be reached on Monday--Thursday from 7:30 AM to 6:00 PM.
